EXPERIENCE

Frontend Developer - Cognizant Chemical Private Limited (6 Month)
- Developed the official trademark website and multiple internal productivity tools such as Chemical Calculator, COA Generator, and Production Data Entry System. Took responsibility for UI/UX design, responsive layouts, optimized front-end code, and seamless user interaction. Worked closely with team members to plan, design, and deploy features that improved workflow efficiency within the organization.

App Developer - Maqja Consultancy Service (3 Month)
- Worked on a live mobile app development project using Flutter & Dart. Designed modern, responsive UI screens, implemented app features, and integrated APIs for real-time data communication. Contributed to testing, bug fixing, performance improvement, and deployment processes. Gained deep practical experience in building user-friendly, smooth, and production-ready mobile applications.

AWS Intern - Cynthi'ans App for Knwoledge (3 Month)
- Gained strong hands-on experience in cloud infrastructure and AWS services including EC2, S3, EBS, IAM, and basic security configurations. Assisted in designing cloud architecture, managing user permissions, and maintaining secure data handling. Worked with the technical team on networking setups, resource optimization, and supporting EdTech product development. Contributed to building scalable and reliable cloud-based solutions.

Software Tester Intern - Cynthi'ans App for Knwoledge (3 Month)
- Worked on testing major features of the EdTech application to ensure high functionality, accuracy, and user experience. Performed manual testing, UI testing, and functional testing across different modules. Identified bugs, prepared detailed reports, and coordinated with developers for quick fixes and improvements. Contributed to enhancing overall app stability and smooth user flow.

SKILLS

- Web Development (HTML, CSS, JavaScrpit, php)
- App Development (Flutter & Dart)
- Tools & IDEs (Visual Studio Code)
- OS Data Recovery (Data Backup, Formatting & Recovery)
- OS Troubleshooting (Fixing Bugs and solve errors)
- Digital Marketing (Fundamentals of Digital Marketing & Social Media Handling)
